

Profile

Living up to our corporate philosophy of “Employing light technology to create a comfortable society and sustainable environment,” we at Iwasaki Electric Co., Ltd. have always aimed high and steadily striven to achieve our business objectives by fully exerting our foresight and creativity. The past several years have seen highly significant R&D advances in the field of new light sources, lighting equipment and control devices that cater to newly arising needs for “eco-friendly” and “visual impact enhancement” lighting. Furthermore, our advanced technology allows us to diversify into a variety of light application fields such as information display systems, UV applications, electronics, and solar simulation systems. These endeavors represent our quest to realize light’s ultimate potential and enable us to advance continually forward. We are shifting from our former identity as a general manufacturer of lighting equipment to re-emerge as a “Light and Environment-focused Company” armed with leading-edge light technologies centering around HID (High Intensity Discharge) lamps and LEDs.
